

March 23, 2020

In our collective battle against COVID-19, Nudo Products is working to navigate through these unparalleled challenges. This week, more States are issuing similar restrictions.

In reviewing these orders, Nudo Products falls under the classification of our business being “essential” in the supply chain of products to critical markets (specifically healthcare, agriculture, food processing plants, government, transportation, telecommunications, restaurants, and grocery stores) identified by the US Government.

Therefore, Nudo Products corporate facilities in Springfield (IL) which includes Prime Panels will remain open.

Nudo Products will continue to monitor information shared by the Center of Disease Control and Prevention (CDC) as well as other public service announcements. This situation is very fluid, but our objective is to continue to deliver products while taking the necessary steps to ensure the safety of all.

These include:

- Maximizing the number of office staff to work from home.
- Eliminating all in-person sales and vendor meetings.
- Requiring employees to maintain a six-foot social distance in offices and on the production floor.
- Eliminating all meetings consisting of more than four people.
- Sanitizing common spaces and shared equipment.
- Making hand sanitizer and disinfectant cleaners available throughout our offices.
- Taking extra precautions with extensive and frequent cleaning
- A strict “stay at home” policy when sick

Nudo Products is in constant communication with our core suppliers and industry partners. We are doing everything possible to maintain our product availability while adhering to proper social distancing practices as the global fight against COVID-19 continues.

Nudo would like to thank you for your continued support.

Shane McNutt
